

Eric Anderson

Chief Medical Officer, Synapticure

Eric Anderson, MD, PhD, MBA, FAAN, is passionate about leveraging technology to develop novel specialty practice models focused on creating the greatest value, outcomes, and experiences for patients. He is recognized as a national leader in telemedicine, mobile health, and alternative practice models. He trailblazed the use of mobile telemedicine in emergency neurology and was the first to demonstrate and publish that remote stroke assessment could be performed with an iPhone. He speaks nationally on the topics of telemedicine, mobile health, and practical applications of technology in the enhancement of patient care. He joined Synapticure from SOC Telemed where He had previously served as the Director of Scientific Affairs, National EEG Director, and Chair of Neurology, where he developed and managed the largest teleneurology practice group, seeing a volume of 8500 consults per month across 300 hospitals. Dr Anderson has led multiple efforts to support and define the practice of teleneurology with the American Academy of Neurology and other organizations.
